

Open Day Programme Report

NBRC Open Day

On January 27, 2020 we hosted 60-70 MSc level students and their teachers from local universities on our campus to engage with researchers at NBRC. The visitors spent almost all day at NBRC and interacted with our scientists, visited state-of-art research facilities, including fMRI, EEG facility, research posters, human stem cells and human brain exhibits. They later had an opportunity to attend a lecture by a highly accomplished Stroke specialist of our country, Padam Shree Prof Padma Srivastava, Chief of Neuroscience Centre and Head Department of Neurology, All India Institute of Medical Sciences, New Delhi. Prof Srivastava gave a talk on Restorative therapies after stroke -drugs, devices and robotics. She delivered her talk in an easy to understand language where she explained the challenges of stroke therapies and current modalities of treatment in India and worldwide. Her lecture was appreciated by all the students and students interacted with her with their questions after the talk.

- Human Brain & Stem Cells Exhibition
 - MRI & EEG Demonstration
 - Lecture
 - Poster Presentation

NBRC Open Day - IISF 2019 Local Event

As part of the IISF 2019, National Brain Research Centre (NBRC), Manesar, Gurugram (Haryana) opened its laboratories to general public and invited schools and colleges to visit NBRC to interact with brain researchers to understand healthy and diseased brain conditions on an 'Open Day' on 31st October, 2019.

Several local schools and colleges visited and actively participated in the programme essentially dedicated to motivate and encourage young and budding students on the importance of Brain Research. Around 150 students and teaching staff from various schools/colleges participated on the Open Day. During the Open day, they were explained about how we did some experiments witnessed live cultures of human brain stem cells under the microscope,

human brain, functional MRI, and EEG recordings. They also attended poster sessions from all the labs of NBRC and a talk by Prof Sharma.

- Human Brain
- EEG Recordings
- Functional MRI
- Human Brain Stem Cells under the Microscope
- Poster Sessions
- Talk

September 20th, 2018

IISF-NBRC Open Day

- Human Brain exhibition
 - EEG demonstration
 - Neural stem cells visualisation
 - Lecture on memory
 - Posters on Labs of NBRC
 - Feedback of event
-

December 16th, 2017

Open Day Programme!

December 16th, 2017

Events on Foundation Day

School visits
Lab visits
Poster viewing for the visiting students
Lecture in auditorium
Quiz competition & Prize distribution
Packed breakfast & lunch distribution to the visiting students & teachers

PUBLIC LECTURE
BY
PROF. KARL J. FRISTON
ON

"I AM THEREFORE I THINK"

TIMING:- @6 PM

**VENUE:-INDIAN NATIONAL SCIENCE ACADEMY (INSA), BAHADUR SHAH
ZAFAR MARG, NEW DELHI**
