Are you worried whether COVID19 can affect mental health, function or cause neurological issues? The webinar on ***COVID and the Brain*** by one of India's most accomplished neurologist at AIIMS New Delhi, provides an excellent opportunity to know how brain gets affected and what are the possible adverse effects of COVID19 on human brain?

We all often get concerned with the reports in popular media that people recovering from Corona virus infection suffer from issues like - confusion, inability to concentrate, loss of smell & taste and carry out normal brain functions. The National Brain research Centre, Manesar in association with CSIR Pensioners Welfare Association (HQs) have organized a Webinar for creating awareness on the subject for its staff, members and general public. We will be able to hear from the expert whether the adverse effect of Corona Virus lingers and continue influence brain function. There will be opportunity to ask questions and seek clarifications for your doubts and concerns.

Please do attend this important Webinar, it is free.
